Introduction

The reality of addiction is that it comes in many forms. For some, it might be in the form of substance abuse or a behavioral addiction like gambling. For others, it could be something as simple as playing video games for hours on end. No matter what the manifestation of addiction may be, the effects can have serious consequences for an individual's physical and mental well-being.

Hope Home exists to address this major issue plaguing our country. As a non-profit organization with a strong focus on providing support for individuals and families dealing with addiction, our goal is to help people reclaim their lives from the grips of addiction and live healthier, more productive lives.

Addiction in Ohio

About Us

Hope Home provides a place of HOPE, helping men and women become free from addictions and other life controlling issues and desperate situations. We plan to multiply our efforts by opening other homes for women, children, and families within the regional area to impact the Columbus, Ohio population with the message of Jesus Christ.

At Hope Home we want to approach recovery differently. That is why our strategy of progress forward with Hope Home will be through our structure and programs to aid in transition of becoming free from life controlling struggles and continue to grow their relationship with Jesus Christ.

Through that relationship and this process, we will equip them with opportunities to make better life choices, restore their damaged relationships/ lives, regain confidence, secure employment, teach essential life skills. Ultimately being able to transition out of the home and live a positive life with permanent change.

Vision

Restoring lives
through HOPE.

Mission

Restore the broken
by REACHING THE
ONE.
